Swedish investment company Mimir Invest Ab invested to Geotechnical drilling consumables, in start of June 2019. With manufacturing sites in Scotland, Finland and the United States, the geotechnical drilling consumables product line is a global market leader providing primarily down-the-hole hammers and related drill bits and casing advancement systems. Its customers are found in the infrastructure, construction, oil & gas and scientific industries.

TerraRoc parts are manufactured according to highest standards and made from best materials. TerraRoc is among the world's leading manufacturers of core drilling equipment. We have supplied our market with high performance products during many generations. Our aim has always been clear – to develop safe and environmentally friendly products with sustainable productivity. The Terracore drilling system is a result from this effort.

Sincerely,

Teemu Rehn
Sales and Application Engineer
